

FREE WEBINAR

Collaborative Delivery for Water and Wastewater: The Basics

Please join the Water Collaborative Delivery Association for a complimentary 90-minute webinar on the basics of implementing collaborative delivery in the water/wastewater sector.

This session is open to all owners and practitioners who are interested in how collaborative delivery might help support *better projects, together*. This one-of-a-kind program will focus on answering the following questions:

- How do you know if collaborative delivery is right for you and your project?
- What are the basics of construction management at-risk (CMAR), progressive design-build (PDB), and fixed-price design-build (FPDB)?
- How do these delivery methods compare and contrast in terms of best practices, risk allocation, and contract forms?
- How are collaborative delivery projects procured and what does “best value” mean?
- What resources are available to support your interest and education in using collaborative delivery?
